Hide files and folders by keyword or drive letters, or by dates and times. Lock files and folders. Re-arrange your desktop icons, no matter where they are in relation to each other. With System Vault, you can move files, folders and even drives without breaking their protection. If you're still in doubt of what the application can do, feel free to check out the manual, which will be of great help in getting started.Q: Capture video on iPhone without an audio source I want to take video of a room that I have no audio and microphone access to. How can I do this? A: If your room has an external microphone on it you can use that to record with. If there's no external microphone, you can use the iPhone camera. The pros and cons to these options: External microphone is much better quality since it's not limited to the phone itself, but the biggest issue is that you'll need to be near a microphone Using the iPhone camera is fairly basic: Use the front-facing camera. To take a picture: Look at the screen. Tap the screen. To record audio: Turn on the camera. Tap the screen. Just listen. Turn off the camera when you're done. Q: How to generate a json object using json array from c# wpf? I have a function in my c# that takes some arguments and returns json in this format: {"tag": {"client_id": "", "create_time": "", "endpoint": "", "type": "0"}, "key": "", "value": ""} The function looks like: public static object GenerateLog(string message, int client_id, DateTime create_time, string endpoint, string type) {

It may take the Cassini spacecraft until September or October before it can finally reveal a portrait of the face of Saturn's moon Titan. Cassini's close pass by Titan in July should reveal deep features of the moon's surface, but it may take the spacecraft until around September or October to produce enough data to do so, according to an Associated Press report. "We're poised to create a portrait of Titan. That will be very cool," project scientist Linda Spilker of NASA's Jet Propulsion Laboratory in Pasadena, Calif., told the AP. "But, because the orbit is such an arc, it will be interesting for the spacecraft to get through it
