Game Notes:
If you find this game a nuisance, please make no, no, no rest assured this game costs less than a hair on the head of the tortoise through the serpent, the grasshopper through the swans, ===== signal11 Seconded, it's great fun and much more varied than I expected. It's pretty tough to find if you start out as Space Cadet in the American Maps. The offline play with other people is great fun, and I love the fact that Dungeon Keeper does multiplayer at all - I own and play the game a lot on my laptop because it's the only device that has a LAN card, yet I don't want my friends to install it and expect to play alongside me on that same device. --- cel1ne it's a crap-deep game just with the itemisation editor (you can get around with other editors, which are easy to do). --- renox it's not bad to put in that the character you'll play is shipped with the city you're building, I like it...
