Field of the Invention The present invention relates to a portable computer, and more particularly, to a portable computer having a detachable display module. 2. Description of Related Art Personal computers typically come in a variety of sizes, from the smallest portable computer to the largest desktop computer. Smaller personal computers are typically small enough to fit into a briefcase or palm. Larger personal computers are typically too large to carry in your pocket and therefore have screens that are too large to fit into a briefcase or palm. Personal computers can also be designed to meet a variety of user requirements, ranging from the smallest personal computer for a home user to the largest personal computer for a business user. Where the personal computer is used for word processing and graphics, the size of the screen is usually an important consideration. Where the personal computer is used primarily as a database, the size of the keyboard is an important consideration. Where the personal computer is used as a tool to input data into a larger computer, such as a mainframe computer, the size of the keyboard may be unimportant. Where the personal computer is used for leisure activities, such as playing video games, the size of the keyboard can be unimportant. The various components on the personal computer, such as the motherboard, disk drive, display screen
