MAC OSX. Suggestions: Note: To avoid the unofficial packs, I would highly recommend buying the latest expansion pack called All About the Money and Mod Release Pack 8. This expansion pack has a (New) Artisan's Workshop with multiple new building sets, and additional land and water improvements. This expansion pack is only \$14.99, and can also be used on Steam ( So, to avoid getting illegal unofficial mods, you can pay \$14.99, and get all the expansion packs for free, and the mod release pack on Steam without any additional downloads. To me, it was the best mod release pack they ever released, and it included full use of the workshop with multiple expansion packs for a cheaper price than in-game. Greetings, and welcome to my first ever server based: Cities Skylines Mods List. At first, you may ask yourself: "Do I really need cities skyline mods? You are probably going to get a lot of mod lists: "make your cities skylines look more like some map X" or "Get your skylines to look more like map Y". However, I'm going to be listing them all in one place, and use my expertise to help you find which mods you want. Before you start, you are going to need to know how to install and modify mods. And because we are only going to be listing them, I will just be listing them in order. So if you get a little lost, feel free to look back over the list, and you should get an idea. So I'm not really sure how many mod lists there will be, but I feel like this one will stick around, because it will be useful to other people. There are just so many more mods than there are Maps or Cities Skylines Maps. A very special thanks to my friend and all round good friend and very good man, DJ Manimal. His patience and support throughout this project is much appreciated. I don't know how many mods it would have taken me a year to write, and DJ Manimal took less than half a day! So thank you, and please, please, please
