Download SFFS Super Phisher free windows version.Hi everyone! I came across your site while doing some searching on how to fix my own Mac. After analyzing the hard drive and checking my serial number it was clear that I needed a new logic board. I had it repaired at a local shop and I am back up and running on my iMac 27". I'm going to be replacing the logic board myself and wanted to see how things were done. I wanted to take the opportunity to thank you guys for the great information and products I have found on this forum. I will try to update this forum everytime I have installed another component and I'll find any other utilities you guys recommend. I look forward to visiting often and I'm glad my search got me here. Thanks for the kind words. The forum is very helpful and there are a lot of smart people here. I rebuilt my iMac and my case and took it to a store. They said it would be closer to \$400 to replace, or as much as \$800 if I wanted to upgrade to a SSD. I didn't think the trade off was worth it, so I changed my mind at the last minute and bought a new one. I also wanted to point out that in some cases, upgrade can be better than a new machine, at least if you can afford it. I got a deal on my new logic board on eBay. I paid \$79 (MacGuy's Deal). I do think it is worth it to save a few bucks sometimes and to save a lot of time and frustration trying to figure out a problem. Again, good luck and I look forward to any recommendations. I'll keep an eye on the forum and if you have any questions, I'll be glad to help. Thanks and I appreciate the kind words. There were a few of us in here that were battling this
