
Alfred And Cavity The Band Apart Rar ((BETTER))

ALFRED GILBEY, Oxford - street, London ... Quan- or chamber between the two, into the cavity of which water is supplied by pipes to produce gas. The chamber is filled, and then the gas is mixed with water, after which the gas comes out of the hole in the upper part of the chamber, and the water flows out of the holes in its lower part (see figure). The upper part of the chamber has a hole for the gas to escape, and the lower part has a hole for filling the chamber. In the lower part of the chamber can be placed and other devices that can perform additional functions. The chamber is shaped like a tube, it can be moved to the desired location and can be rotated around its axis.
